

The Battle of Neighborhoods

“Wontons in London”

**IBM Capstone Project
2020**

The Challenge

To find the most suitable location for a new Chinese restaurant in London, UK.

To best satisfy the following conditions:

- Affordable
- Competitive
- Busy

Can we use *data science* to complete this task?

Methodology

Resources:

- Wikipedia
- Property Data
- Foursquare Location Data

Techniques:

- Exploratory Analysis
- Machine Learning

Process:

- Acquire London Property Pricing Data
- Acquire and Explore London Population Data
- Suggest Locations

- **Barnet = 22**
- Tower Hamlets = 50
- Southwark = 50

Conclusion

Barnet is the most suitable location for a new Chinese restaurant.

Reasoning:

- Highest Chinese population (8259)
- Fewest local competitors (22)
- Relatively cheap property price (£618,697)

Limitations:

- Boroughs in dataset limited by source (19/32)
- Property prices not guaranteed (average)
- Dataset for London populations outdated (2011)
